Fiscal Impact Statement:
The Department of Social Services estimates the costs incurred by the State and its political subdivisions in complying with the proposed regulation will be minimal. The cost to child care providers to comply with the proposed regulations is not able to be determined because that type of data is not currently kept at the agency. Although providers will incur some costs, it is hoped that those costs can be minimized and grants to assist providers in meeting the new requirements may be available.

Statement of Rationale:
The purpose of these regulations is to establish standards that protect the health, safety and well being of children receiving care in group child care homes, through the formulation, application and enforcement of these regulations. Child care licensing standards provide the foundation for ensuring safety and quality for children. These proposed regulations improve readability and strengthen and clarify basic health and safety standards.

The improved readability and clarified basic health and safety standards will enable parents to be better-informed consumers of child care. Staff:child ratios and well-trained consistent caregivers are critical factors in child care. States with higher quality standards in their regulations report better outcomes for children.

The agency will implement the regulations with existing staff and resources, which have been maximized as a result of the transfer of the CCDF-financed ABC Child Care Program to DSS. Quality early childhood experiences have an economic and social benefit to the State:

- SC employers have reported that employees who have safe, dependable, high quality environments for their children while they work, demonstrate increased productivity and decreased absenteeism.
- Children in high quality child care are more likely to be ready to learn and successful in school and grow into contributing members of society rather than members of the welfare or corrections systems.
The positive implications of quality early childhood education and child care for juvenile justice, schools, and the workforce are emphasized by the National Conference of State Legislatures (NCSL) in Early Childhood Care and Education: An Investment That Works (1997).

Lawrence J. Schweinhart of the HighScope Perry Educational Research Foundation states: “...a high-quality program for young children living in poverty, over their lifetimes, improves their educational performance, contributes to their economic development, helps prevent them from committing crimes, and provides a high return on taxpayer investment.”

Changes in licensing requirements are minimal. Although providers may incur some costs, it is hoped that those costs can be minimized and that grants to assist providers in meeting the new requirements may continue to be available.
